

LINCOLN ROAD PROJECT STATUS UPDATE

During the past couple of weeks the Lincoln Highway Department has been working on the drainage on Baker Bridge Road and Sandy Pond Road. The drainage work on these two roads is nearly complete, and drainage work will be shifting to Trapelo Road.

Paving work on Baker Bridge Road and Sandy Pond is scheduled to begin on Monday, August 10 and continue for several weeks. The work necessitates that the roads be in a gravel state for a short amount of time prior to paving. During this time, the road will be fully open and passable.

Road closures on Baker Bridge Road are likely when the pavement work is being performed. Emergency access, and access to homes will be permitted at all times.

Questions regarding the Paving Project should be directed to the Highway Department at 781-259-8999.
