

26 September, 2007

(As roughly outlined by Mark Hochman)

Assets and institution inventory and analysis – the Structure, Concerns and Priorities of Organizations and citizenry as potentially applied to the Town.

- Current role in Town
- Demographics and Citizens affected
- Organization's critical needs and possible Town roles and requirements
- What leverage does the Town have to use these resources
- What parts of needs/leverage can we incorporate into the Master Plan
- What priorities?
- What are the organization's time objectives
- Thereafter develop a schedule

Priorities: to be established through focus groups rather than surveys; a qualitative rather than quantitative process

- Financial costs
- Demographics: (the number of people touched/affected)
- What Town values drive decision making – the process
- How is the process guided and how are decisions made – (in Lincoln it is quasi oligarchical)
