Evaluation Criteria

• Compliance with the submittal requirements
• Demonstrated expertise on similar projects
• Staffing equipped with appropriate knowledge.
• Proven ability to work effectively and efficiently with a municipal government
• Documented ability to complete projects on time and on budget

Certificate of Insurance

Designer Selection Board Form
June 30, 2014

Timothy Higgins, Town Administrator
Town of Lincoln
Town Offices
16 Lincoln Road
Lincoln, MA 01773

Dear Mr. Higgins,

Thank you for the opportunity to submit our qualifications to provide professional services associated with Lincoln’s Community Center Feasibility Study. This is exactly the kind of community based work that we have been doing for well over two decades, and our integrated approach to architecture and community planning is ideally suited to this task. We will work with the steering committee and all of the stake holders – community organizations, citizens, town departments and leaders – to explore and document the most desirable and cost effective way(s) forward, to build consensus, and to shepherd the process to and through the fall and spring Town Meetings.

Abacus firm principals David Pollak and David Eisen work side by side leading all of the firm’s community planning and architectural design work. Our collaborative practice of both designing public buildings and working with Massachusetts towns, cities and pubic authorities on smart growth planning enables us to make sure that our design work fits into the overall cultural, political and geographical community context while at the same time meeting the architectural program and budget requirements. This success is demonstrated in both the strength of our clients’ endorsements and the many awards that our relevant work has received.

In addition, I am a Brookline School Committee member and chair of the Capital Projects Subcommittee, and previously served for eight years on the Brookline Building Commission. I am and have been actively involved in many similar projects from the town side, and bring significant practical understanding and experience to the task of planning and managing community and public facility projects. Putting it simply, we plan for and design smart and beautiful buildings. We are equally attentive to listening, and experts in working with communities to bring their projects to successful completion.

Yours sincerely,

David Pollak
Abacus Architects + Planners has complied with all of the submittal requirements and meets all of the minimum qualifications of this RFQ.

- Complete Designer Selection Board Forms are included in the final section of this proposal.

- Our qualified staff, led by firm Principals David Pollak and David Eisen, is presented under Criterion 3.

- Our many community center studies are discussed under Criterion 2 and further documented in the Similar Projects Portfolio section that follows.

- A copy of our insurance coverages certificate is included. All required minimum coverage limits are currently met or exceeded with the exception of the General Liability Annual Aggregate Limit. This is currently set at $2,000,000 and will be raised to the required $3,000,000 to meet Lincoln’s request.
Over the past 25 years Abacus has worked with municipalities and public agencies across Massachusetts and New England on needs assessments, site assessments, and adaptive reuse studies for community, elderly, recreation and municipal uses. We have worked closely with Councils on Aging, Recreation Departments, and a broad range of community groups to insure that needs are met in the most cost effective way possible. We are committed to developing a transparent community engagement process that is both inclusive and conclusive.

Relevant projects are presented on the following pages.
**ABACUS ARCHITECTS + PLANNERS**

**DEMONSTRATED EXPERTISE ON SIMILAR PROJECTS**

**Intergenerational Community Center, Feasibility and Planning Study, Randolph, MA**

Throughout early 2013 Abacus worked closely with the Town Planner, Town Manager, and the heads of the Recreation Department, Senior Center and Libraries developing a program and studying sites across the Town of Randolph.

A series of public meetings and workshops were conducted with various stakeholder groups.

Five sites were selected for further study and schematic designs developed for two sites including site plans, parking and circulation, building plans, building massing and interior and exterior views.

Randolph has subsequently finalized site selection and is currently reviewing A/E qualifications (including ours) in anticipation of moving ahead with the project.
Many of the programming and site selection choices that Randolph grappled with are similar to those facing Lincoln. One leading site was in the town center adjacent to the town hall, high school and library. The other - and the one that was ultimately selected - is adjacent to recreation facilities and is easier to build on because it doesn’t require relocating other town facilities. Working through these variables in a well structured public process was key to moving the project forward.

Town of Carlisle - 338 Bedford Road Facilities Master Plan

Following a November, 2012 Special Town Meeting vote, The Town of Carlisle acquired the 6 acre 338 Bedford Road Property and engaged Abacus and sub-consultants Ryan Associates (Landscape) and Samiotis Consultants (Civil) to conduct a public process and develop a master plan for how to best utilize the property for town purposes.

The property fills in between two larger town-owned parcels - one of which has most of the town’s ball fields and the other is conservation land. Two five-bedroom group homes for developmentally disabled adults will occupy part of the site, and a new community center will occupy the remainder. The program closely paralleled Lincoln’s needs: a space to meet the needs of the growing senior population as well as other constituencies including teens and community organizations, parks and recreation offices and programs, and a range of outdoor recreational uses.

Abacus organized decision charrettes where participants explored various site layout and program options.

The Design Team prepared a seies of site design studies that included housing and a community center
DEMONSTRATED EXPERTISE ON SIMILAR PROJECTS

A detailed work plan was developed and carried out that included two public design charrettes, a series of presentations to town boards and commissions, and a public forum. For the first design charrette Abacus walked the site with participants and then provided them with foam building blocks that could be moved around on large scale site drawings and satellite photographs.

Abacus principals David P and David E guided group work and documented results in a series of design options that were then refined and brought back for further input and discussion in the second charrette.

Abacus developed conceptual layouts for a community center at a series of different sizes to help clarify costs and benefits.
DEMONSTRATED EXPERTISE ON SIMILAR PROJECTS

Jefferson Park Community Center
Cambridge Housing Authority

As both master planners and architects for Jefferson Park, Abacus has carried out several community center studies and is currently in construction on an adaptive reuse project to provide medium-term facilities for a range of programs while simultaneously preparing construction documents on a six thousand square foot new facility to house community programs. In addition, Abacus has developed a design for a new community center and management office building that remains part of the long range facility master plan for Jefferson Park.

The new community center will include a variety of areas for recreation, fitness, arts, classrooms and meetings. The building is oriented for passive solar heating and winter shading. Spaces line an internal street that connects to the neighborhood on either end and welcomes people in, creating a campus-like setting in the community. A variety of service providers were included in the programming and planning process. Project is on hold awaiting project funding.

Contact: John Woods,
Project Manager, Cambridge Housing Authority
617-520-6254
Jefferson Park Housing and Community Facilities
Cambridge Housing Authority

A failing public housing development will be replaced with new housing and community spaces. The $38,000,000 development will be focused on a series of courtyards that reconnect back to the surrounding neighborhood. Dynamic forms and sheltered spaces will help create a vibrant sense of community.

The design is based on a feasibility study and master planning process that included 12 public meetings and the consideration of a broad range of options. Construction Documents are nearly completion. Community spaces will include a range of classroom and meeting rooms for adults, senior, and children’s programs.

Project Manager, Cambridge Housing Authority
617-520-6253
Senior Center and Housing
Peter Bulkeley Terrace, Concord, MA

This 1909 elementary school in the heart of Concord Center has been renovated as a fully accessible senior center and apartments. Careful site design and grading has converted what were once the basement locker room into a new two-story space living room and outdoor gathering space, bringing the building to life.

The $5,800,000 facility provides a range of spaces that accommodate social and educational activities for the community. Close collaboration between Abacus, the engineering team and the Town has produced a design that optimizes energy resources, enhances the appearance of the building inside and out, and will reduce maintenance costs; all within a limited budget. Abacus worked closely with the director of Senior Programs so that spaces could accommodate a range of needs.

Executive Director, Concord Housing Authority
(978) 369-8435
Senior Housing and Community Facilities, Jewish Community Housing for the Elderly

Abacus is in design development on a 55,000 square foot mixed use complex for seniors in Brighton. The facility is designed for older residents from diverse backgrounds, and will provide a series of interior and exterior function spaces that connect to the main JCHE campus next door, and to nearby shopping and civic areas.

Different floors will provide different living arrangements and different opportunities for socializing. Generous lounges and meeting spaces offer the flexibility for a changing array of programs responsive to resident needs.

Allencrest Community Center
Leominster Housing Authority

This new community center provides flexible spaces that support a series of different public uses. The design combines passive solar heating and natural ventilation with a high efficiency HVAC system, expertly worked into the building’s spatial structure, to reduce energy usage while maintaining a high level of user comfort. Winner of the AIA and Boston Society of Architects Honor Awards. The building provides spaces for after school learning and for adult and senior programs.

Contact: Eugene Capoccia, Executive Director
Leominster Housing Authority
(978) 537-5300
Lincoln Way Community Center
Cambridge Housing Authority

A new community center weaves glass, brick, wood and metal together to form an inviting public place for meetings, classes, and celebrations. The building is tied into its tight urban context through the use of materials while providing a contemporary sense of openness.

The new building utilizes the back walls of two adjacent building to reduce construction costs. This building was part of a larger project that renovated 7 other community centers. The project won a Boston Society of Architects Accessibility Award.

Contact: Terry Dumas, Executive Director
Cambridge Housing Authority
(617) 520-6263
Menotomy Manor New Community Center/Housing Development Modernization

This redevelopment of a 46 building, 178 unit family housing development included both major rehab and new construction to provide ten barrier-free apartments. The project began with a thorough conditions assessment of the site and buildings and the engineering team developed feasibility analyses for renovation and new construction options and prepared cost/benefit analyses. Alterations for accessibility included new stair towers that provide a gateway to the community and additions to duplexes to provide barrier-free apartments.

The proposed community center provides classrooms, offices, recreational facilities and a new face and focus for the entire development.

The project won a 2011 Boston Society of Architects Accessible Design Honor Award.

Waterfield Block Planning Study
Winchester, MA

One of two recently completed studies for the Winchester Planning Board, this mixed use schematic design for a parcel in adjacent to the Town Common and the Commuter Rail Station supports the revitalization of the entire village center.

Abacus proposed a mix of housing, office, restaurants and retail, and civic uses with below grade parking defining central community spaces and sloping lawn. The terracing of the site connects up to the elevated rail platform with a series of gently inclined accessible walkways. Work included two public presentations.

A series of public meetings identified community concensus and offered a forum for discussing options.

Renovations and Site Redesign
Beals Library, Winchendon, MA

Abacus is in construction document phase for the redesign of the site, construction of a new entry, a new children’s library and new elevator and stairs. This work will reconnect the building to the street and the adjacent park while meeting accessibility requirements.

New construction complements the historic library to meet the needs of a new generation of library users. Abacus developed a series of options for meeting Town needs. Pros and cons were evaluated and consensus built around the most cost-effective direction.

Kabballah Center  
Brookline, MA

Translucent panels and douglas fire built-ins define a series of light-filled educational and worship spaces and a 100-seat assembly room in a storefront space in Coolidge Corner. Hovering panels, layered materials, and filtered natural light create a rich environment on a limited budget.

A bookstore, office, meeting room and meeting spaces provide flexibility for changing uses while meeting specific programmatic needs.
Beth Shalom of the Blue Hills, Milton, MA

A new Synagogue will include a sanctuary space seating 160, offices, a library, and a series of flexible meeting and class rooms lining a central street-like spine. Skylights, clerestory windows and curtain walls will look out onto the landscape and open up to the sky. Moveable walls will allow the sanctuary and other spaces to be divided into smaller rooms, or opened up for larger gatherings. Oversized doors will lead out onto terrace and into gardens that will function like outdoor rooms.

The building is carefully integrated into the landscape to respect residential abutters and protect the natural setting.

(781) 246-6397
Abacus Architects, in collaboration with housing consultant Karen Sunnarborg and the Town of Amherst, identified a series of sites where mixed use, commercial, and housing development can reinforce the character of Amherst while providing much needed housing. Four critical sites were further developed using three dimensional modelling to demonstrate how new housing and commercial space can work to strengthen the neighborhood and streetscape. These schematic designs were presented and discussed in a series of public forums to broaden the community’s understanding and attitudes toward housing and development issues.

Town of Amherst
(413) 259-3040
**Smart Growth Master Plan, Hanover, MA**

Multi-family housing was combined with retail to reinforce commercial areas and provide centers for civic life. Larger development along busier retail streets, and smaller development at rural crossroads provide walkable neighborhoods for nearby residents. Generous open spaces reflect both traditional town planning approaches and innovative ways of meeting storm water management requirements.

A series of public meetings built consensus for the plan as a way to preserve town character while meeting a range of other needs, including providing housing for town employees, the elderly, and young families.

(979) 465-4400
Smart Growth Master Plan, Newburyport, MA

Abacus and housing consultant Karen Sunnarborg prepared Newburyport’s Housing Master Plan. Housing needs were assessed, and the city’s policies and programs evaluated in public workshop. This work was followed by a series of recommendations for increasing affordable housing. In parallel with this work we investigated planning options and development opportunities that will weave housing and mixed use development into the fabric of the city, reinforcing its character and economy. Focus areas include a series of waterfront, downtown, and industrial zone sites, as well as transit orient development areas near the commuter rail line that were selected in a community review process.

Abacus Architects + Planners is a Partnership established in 1989 to provide the highest quality design services for public and private clients. We have worked with cities and towns throughout the Commonwealth on programming and planning, adaptive reuse, and new construction projects.

Partners David Pollak and David Eisen are registered architects and David Pollak is a LEED Accredited Professional in Building Design and Construction. David Pollak will be Principal-in-Charge and Project Manager for Lincoln, and one or both partners will attend all client meetings, make all presentations, and take direct responsibility for every aspect of this project.

Both partners are very active in local affairs; David Pollak is chair of the Capital Improvements Subcommittee of the Brookline School Committee and formerly served for eight years on the Brookline Building Commission which oversees all capital projects for the 76 Town-owned buildings. David Eisen is Vice President for Communications of the Boston Society of Architects and serves on Boston’s Back Bay Architectural Commission.

The Lincoln Community Center Feasibility Study team also includes Associate Derek Little and Designer Julia Patten. Derek has been with Abacus for the past seven years and is highly knowledgeable in design, building technology, and anchors the office staff in our use of Revit and Sketch-Up the primary software platforms that we utilize for design, visualization and communication on both studies and building design projects. Julia is an architectural designer who is passionate about community design and public process. Additional members of our nine-person staff will be available to work on the project on an as-needed basis.

Tim Brown and North Bay Construction Consultants rounds out our Lincoln Community Center Feasibility Study team. Tim is an expert cost estimator and former construction contractor who we partner with on most of our projects. He is thoughtful, timely, dependable, accurate, and up-to-date on current costs in the public bid environment. North Bay is a certified WBE by Mass. SDO (formerly SOMBWA).

We see our clients, Town officials and departments, contractors and the public as part of our team. We build close working relationships with a broad range of interested parties to insure that all important concerns are heard, that funding, approval, bidding and construction proceeds smoothly, and that the work is in line with expectations and requirements. We have won prestigious awards from the Boston Society of Architects and American Institute of Architects, and have had our work featured in regional and national publications in recognition of our efforts.

Note that if additional sub-consultants are required: civil engineers, geotechnical engineers, etc. we can add them to our team after reviewing with the Town. We have experience sub consultants in all disciplines that can provide necessary services.

Since its founding in 1989 Abacus Architects + Planners has worked with cities, towns and public agencies across Massachusetts and New England to solve problems through public process and consensus building. We understand public construction requirements and pay careful attention to the quality of our documents and our communication. Over each the past 20 years our public work has made up anywhere from 50% to 90% of our total effort. This work takes many forms with the constant being the care we take on each project no matter how big or small and the confidence that our public clients have in us.

Most of our projects for municipal governments involve public meetings for gathering information, presenting options and building support for the selected direction. The community process is carefully planned to achieve established objectives using a variety of means.

We also work as ‘house doctor’ architects for several municipalities and agencies. These include Cambridge Housing Authority with whom we are in our 13th year as house doctors (in addition to carrying out many major projects that were procured through designer selection), and the City of Chelsea where we have just been re-hired to continue providing design review consulting services to the city’s planning department.

We encourage you to contact our many references and let them speak in more detail regarding the quality and care that we bring to all of our municipal work.
Our ability to consistently deliver on-time and on-budget starts with our commitment to open, clear and vigorous communication. We partner with our clients to help them solve programming, land use, facility and related planning and architectural problems. Success flows from shared understanding and commitment. We discuss budgets and schedules early and often, and work hard to make sure both are realistic and up to date. Schedules, particularly with municipal projects, can depend on the schedules of volunteer boards and committees, necessary reviews, grant or filing deadlines, Town Meeting Warrant closings, and many other variables.

We understand the schedule for this project in relation to the Town meeting schedule and will organize the effort to meet the established deadline as we have on all other municipal projects.

Every municipal project begins with a compelling need or set of needs. We respect this and aspire to bring forward the very best solution or solutions to meet those needs. Budget is always close at hand, but we do not believe in suppressing or ignoring good ideas because of preconceptions about affordability – every idea should find a place in the community conversation long enough to be discussed and evaluated. To reconcile this built-in friction between aspiration and affordability, we practice early and iterative budgeting and cost estimating. North Bay’s Tim Brown has proved invaluable, as he is adept at concept level budgeting and budget comparisons that have allowed us to bring in a series of complex projects on budget.

Ultimately, the proof our ability to complete projects on time and on budget is demonstrated with our clients who continue to return to us over years and decades. More than half of our work is consistently repeat business for long-term public clients. Again, we encourage you to speak with them.

<tr>
<td>David Pollak is a graduate of Dartmouth College and the Harvard Graduate School of Design. He is founding partner of Abacus Architects + Planners and a LEED Accredited Professional. He has designed and successfully completed scores of public buildings, renovations, and planning projects that meet client needs in cost effective ways, offering a range of options, carefully detailed drawings and specs and attentive construction services. As a LEED AP he leads the firm's efforts in sustainability and green materials and strategies. He has completed over two dozen projects under M.G.L. c. 149. David has over 25 years of experience working on buildings, building studies and planning for public clients throughout New England. David's work with public buildings extends to his service on the Brookline School Committee where he heads the Capital Projects Subcommittee and previous service on the Brookline Building Commission which is responsible for all improvements to the 76 town owned buildings. He taught architectural design and urban planning at Roger Williams University and RISD for many years. He has also served on the Brookline Green Building Committee, the boards of two real estate companies, and the boards of several community organizations.</td>
<td>David Eisen is a graduate of the University of Illinois and the Harvard Graduate School of Design. He has over two decades of experience leading design teams for public and private projects similar to the Town of Randolph's Community Center. He has designed and successfully completed new construction and building rehab projects and site improvement projects that are carefully responsive to program, site, historic context and code requirements - on time and on budget. He has been the project manager or principal in charge for many community center projects, including those in Leominster and Cambridge, and understands their challenges. He has worked with state and local officials to achieve consensus on planning, design, approval and funding issues on many building types. David has developed extensive technical expertise with building construction and cost effective ways to meet programmatic, code and accessibility requirements. He is a frequent guest design critic at the M.I.T., Harvard, Northeastern, R.I.S.D. and Roger Williams University. He architecture schools and writes frequently about planning and design issues for newspapers, magazines, and websites. He serves on the Back Bay Arch. Commission and is a Vice President of the Boston Society of Architects.</td>

<tr>
<td>1</td>
<td>Randolph Intergenerational Community Center Study, Randolph, MA</td>
<td>Abacus worked with the Town Planner, Recreation Department, Library, Planning Department and Town Manager locating possible sites and developing a program. Five community meetings were held to solicit citizen input. A series of options were developed that were then analyzed in terms of costs and benefits. Abacus then prepared detailed designs for two different sites and prepared conceptual cost estimates. The buildings include gymnasia, athletic facilities, and a range of other community spaces. Buildings are fully accessible.</td>
<td>Michelle Tyler, Town Planner Town of Randolph 41 South Main Street, Randolph, MA (781) 861-0963 <a href="mailto:myler@randolph-ma.gov">myler@randolph-ma.gov</a></td>

<tr>
<td>3</td>
<td>Jefferson Park Master Plan Study and Design, Jefferson Park Community Center Design Study, Cambridge, MA</td>
<td>The Cambridge Housing Authority, long time Abacus clients, hired the firm to evaluate Jefferson Park revitalization options. Abacus prepared feasibility analyses of 3 options: minor renovations, major renovations, demolition and new construction. Detailed cost estimates and cost/benefit analyses allowed pros and cons to be evaluated. Highly resolved renderings suggested the spatial and design improvements that could result, and associated improvements in quality of life. Abacus is now in construction documents for demolition and new construction. The new design positions buildings around green spaces that act as rain gardens. Every apartment has its own entry and associated exterior space to build a sense of ownership in the community. A new street restores the urban grid and connects the development to the surrounding neighborhood. This project includes 6,000 SF of classrooms, meeting rooms and computer labs for a variety of community programs.</td>
<td>Terry Dumas Director of Planning &amp; Development Cambridge Housing Authority 675 Mass. Ave Cambridge, MA 02139 (617) 520-6263 <a href="mailto:tdumas@cambridge-housing.org">tdumas@cambridge-housing.org</a></td>

<tr>
<td>(4) Allencrest Learning Center</td>
<td>This 2,000 SF community education center provides flexible space for a variety of uses. Abacus worked closely with LHA Associate Director Bernie Kirstein and Education Director Margaret St. Laurent to define the building program and planning approaches. The process began with a feasibility analysis of a number of building sites and building organizations and ways to integrate “green” design and construction approaches into the project. These included passive solar, solar PV, a fuel cell and cogeneration. A variety of HVAC systems, window types, insulation types and structural systems were evaluated for their cost effectiveness. The completed design offers individual study spaces, group learning areas, and a large central area for community meetings. The interior is warmed by the low southern sun and has a broad canopy that shelters it in the summer. High performance building systems are a model for sustainable design. The building was built by students from the local Vo. Tech. high school. The project won AIA New England and Boston Society of Architects 2012 Honor Awards.</td>
<td>David Eisen</td>
<td>March 2012</td>
<td>$400 (Plus community contributions- $800,000 value)</td>
<td></td>
</tr>
<tr>
<td>(5) Peter Bulkeley Terrace</td>
<td>Additions to and renovations of this masonry, steel and wood framed school to housing and community spaces revitalizes the exterior and interior and meets critical Town needs. Features include: • Accessible exterior spaces and entries that integrate the building into the surrounding community and form a civic campus in conjunction with adjacent buildings. • Interior renovations that adapt the building for new uses with dramatic but intimately scaled two story spaces and a variety of community spaces. • Renovation of exterior assemblies to restore the building’s character while complementing it with contemporary amenities.</td>
<td>David Eisen/ David Pollak</td>
<td>Jan 2013</td>
<td>$5,200</td>

Abacus Architects is a nine person firm with 25 years of experience successfully completing public work. We are small enough that Principals David Pollak and David Eisen manage every project, and large enough to get work done effectively and on time. We have recently expanded our office adding personnel with extensive experience with projects similar to Lincoln’s Community Center Study while retaining long-time employees.

Our work has won a series of prestigious awards including two AIA New England, and nine Boston Society of Architects Design Awards, and two 2013 national AIA/HUD Secretary’s design awards. Most of these awards were for public projects executed on limited budgets.

Abacus is a Revit (BIM) based firm, allowing us to represent conditions and present ideas clearly to our clients, consultants, and regulatory agencies. Revit interfaces easily with AutoCAD and a range of energy modeling software. And Revit allows us to develop unlimited 3 dimensional rendered views of interiors and exteriors, urban scale views and details, for public presentations and discussions with builders.

We have worked closely with our cost estimating consultant Tim Brown of North Bay for many years and his expertise supplements ours, giving the team the highest qualifications in all of the Selection Criteria areas.

11. Professional Liability Insurance:

<table>
<thead>
<tr>
<th>Name of Company</th>
<th>Aggregate Amount</th>
<th>Policy Number</th>
<th>Expiration Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Navigators Insurance Company</td>
<td>$1,000,000/$2,000,000</td>
